

Prepare your two or three year old for optimal learning. Help them get the most out of their preschool experience. Whether your child is on a waiting list for a preschool program, or as an added step in their education, RightTime KiDS™ Preschool Prep is designed specifically for your child’s developmental needs. We teach the skills to get him or her ready for preschool. Using a proven curriculum, your child will be focusing on the development of fine motor skills, socialization, and preschool concepts such as raising hands, taking turns and following directions. Imagine an activity-based learning environment that mirrors those used in preschools. Your little one will get to participate in weekly themes planned to introduce them to new and exciting concepts they’ll use to build their social and learning skills.
